Projects

Hackathon (Devsoc) Codechef June'23

VIT Vellore

Founder

To mitigate global warming and reduce carbon footprint, my team and I have collaborated on the development of a website dedicated to supporting environmental causes. The platform includes features for fundraising and other facilities. Our efforts involved a continuous 48-hour work session during a hackathon competition to illuminate the path toward a sustainable future.

Google Analytics Sep'22 to Feb'23

Student

I've completed **Google Analytics**, a potent web analytics service. It delivers crucial insights into website traffic and user behaviour, measuring metrics like page views and bounce rates. Businesses leverage this data to optimize strategies and gauge marketing campaign effectiveness. Google Analytics offers user-friendly dashboards for informed decision-making, empowering businesses to enhance their online presence and achieve digital goals.
